

17 — Web Development & No-code Freelancing

WordPress · Webflow · Framer · Landing pages · 2026

■0 skill capital · Local projects + dollar clients

How to build and sell websites and landing pages for Nigerian businesses and global clients using WordPress or modern no-code tools. Covers realistic local rates, portfolio building and client acquisition.

1. What This Hustle Is

You design and build websites, landing pages, simple e-commerce or membership sites for clients. WordPress remains the most common request in Nigeria. Webflow, Framer and similar no-code tools are growing for modern marketing sites. Clients pay per project or on retainers for maintenance. You do not need traditional coding to start — many successful freelancers work primarily with page builders and no-code platforms.

2. Realistic Earnings 2026

Level	Local project	International	Monthly potential
Beginner	■100k–■300k / site	\$15–\$30 / hr	■150k–■500k
Intermediate	■300k–■800k / site	\$30–\$60 / hr	■400k–■1.2m
Specialist / agency	■800k–■2.5m+	\$50–\$120+ / hr	■1m–■3m+

Local simple business sites commonly sell for ■150k–■400k. E-commerce and custom work go higher. Dollar clients via Upwork/Fiverr or direct outreach produce strong naira income after conversion.

3. Skills That Sell

- WordPress + Elementor / Gutenberg / Bricks (highest local demand)
- Webflow or Framer for modern marketing / SaaS-style sites
- Landing pages optimised for conversions (ads, launches)
- Basic SEO, speed, mobile responsiveness and Paystack/Flutterwave integration
- Simple e-commerce (WooCommerce) or membership setups

4. Setup & Portfolio (■0–low)

- Learn with free resources (learn.wordpress.org, official Webflow University, YouTube).
- Build 3–5 demo sites (personal brand, local business mock, landing page, simple shop).
- Host demos on free or cheap hosting / Webflow free tier.
- Create a clean portfolio page with screenshots + short case notes.
- Open Payoneer/Grey + local bank for payments.

5. Client Acquisition

1. Local outreach: small businesses, churches, schools, coaches on Instagram/WhatsApp/LinkedIn.
2. Upwork / Fiverr — clear gigs for WordPress or Webflow sites.
3. Offer redesign or speed-fix packages as entry offers.
4. Maintenance retainers (■30k–■100k+/month per client) for recurring income.

6. 30-Day Path

Days 1–14: Skill focus + 3 demo sites. Days 15–21: Portfolio + profiles live. Days 22–30: 15 outreach messages + first proposals. Aim for first paid project or paid test.

7. Action Checklist

- Core tool chosen (WordPress or Webflow/Framer) and practised
- 3–5 demo / portfolio sites ready
- Payment rails open
- Upwork/Fiverr + LinkedIn profiles complete
- 10+ personalised outreach messages sent
- Simple proposal and contract template ready
