

18 — Online Course Creation

Selar · Teachable · Own platform · Knowledge products · 2026

Low capital · Phone + screen recording possible · Recurring sales leverage

How to package what you know into a structured course that sells on Selar and beyond. Covers topic selection, simple production, pricing for Nigerian buyers, launch sequence and how to combine courses with coaching.

1. What This Hustle Is

You create a structured learning product (video modules, PDFs, worksheets) that takes a student from problem to result. You sell it once and it can generate sales repeatedly. Platforms like Selar make this accessible for Nigerian creators with naira payouts and mobile-friendly delivery. You can start with a short focused course and later add coaching or higher-ticket offers.

2. Realistic Earnings Path 2026

Stage	Typical offer	Monthly range
First launch (0–3 mo)	One short course ■5k–■25k	■0–■200k
Growing (3–12 mo)	Course + small audience + affiliates	■150k–■800k
Established	Course suite + coaching + list	■500k–■3m+

Income is front-loaded by launches and then becomes more recurring with email list, affiliates and evergreen sales. A single well-marketed ■15k–■50k course with 20–50 sales per month already produces serious naira income.

3. High-Demand Course Topics for Nigerian Creators

- Online income skills (freelancing, Canva, CapCut, VA, writing, AI tools)
- Exam & academic (JAMB strategies, IELTS, specific subjects)
- Digital skills (social media, basic coding, Excel, Notion systems)
- Personal finance & saving in naira / side-hustle systems
- Career / soft skills (CV, LinkedIn, interview, productivity)
- Niche professional knowledge you already have from work or side projects

4. Exact Setup Sequence

4.1 Tools (low or zero cost)

- Phone or laptop + free screen recorder (OBS, Loom, CapCut, phone screen record)
- Canva for slides and thumbnails
- Selar for hosting + payments (naira + multi-currency) — primary recommendation for Nigeria
- Optional later: Teachable / Thinkific if you need more advanced student features
- WhatsApp + email (or free Kit/Mailchimp) for communication

4.2 Create a sellable first course in 14–21 days

1. Pick one clear transformation (e.g. “From zero to first Fiverr order in 14 days”).
2. Outline 5–8 short modules (10–20 min each is fine).
3. Record with phone or screen + voice; edit lightly in CapCut.
4. Add simple PDF worksheets or checklists.
5. Upload to Selar, write a benefit-focused sales page, set price, enable affiliates if desired.

5. Pricing & Offer Structure

- Entry / short course: ■5,000–■20,000
- Mid-range structured course: ■20,000–■50,000
- Premium + community or live calls: ■50,000–■150,000+
- Always show the outcome and who it is for. Add bonuses (templates, checklist, short call) to increase perceived value.
- Enable Selar affiliates so other creators can promote for a commission.

6. Launch & Student Acquisition

1. Build a small warm audience first (WhatsApp status, Instagram, TikTok, existing clients).

2. Pre-sell or run a short free live / WhatsApp challenge that leads into the paid course.
3. Post daily value content that points to the course problem/solution.
4. Use Selar affiliates and simple email/WhatsApp sequences after the first sales.
5. Collect testimonials aggressively after the first cohort.

7. Sample Sales Angle

“Most people watch free tutorials and still never land their first paid client. This 7-module course gives you the exact profile setup, outreach messages and delivery system I used to get consistent orders — built for Nigerian internet and payment reality. Lifetime access + templates. ■15,000 on Selar.”

8. Common Mistakes

- Making a 20-hour encyclopaedia instead of a focused transformation course.
- Perfecting production for months instead of shipping a useful first version.
- No clear promise or target student on the sales page.
- Ignoring mobile experience and data-friendly video lengths.
- Launching with zero audience or warm list.

9. 30–45 Day Action Path

Days 1–7: Choose topic + transformation. Outline modules. Set up Selar account and payment.

Days 8–21: Record and lightly edit modules. Create worksheets. Build sales page + thumbnail.

Days 22–30: Soft launch to friends, existing clients and social following. Collect first sales + feedback.

Days 31–45: Improve based on feedback. Run a proper launch or evergreen promotion. Add one bonus or affiliate push.

10. Action Checklist

- Clear transformation topic and target student defined
- Course outline (5–8 modules) written
- Recording + light editing setup tested
- Selar account live with payment method connected
- Sales page + price + at least one bonus ready
- First promotion plan (WhatsApp, social, warm list) prepared
- System for collecting testimonials after purchase
